

# CEMCAP

## Key figures:

Duration: May 2015 - October 2018  
 Budget: 10,030 kEUR  
 EC contribution: 8,779 kEUR  
 Swiss government funding: 704 kEUR  
 Industrial funding: 547 kEUR  
 Coordinator: SINTEF Energy Research

Kristin Jordal<sup>1</sup>, Sigmund Ø. Størset<sup>1</sup>, Matthias Hornberger<sup>2</sup>, Reinhold Spörl<sup>2</sup>, Johannes Ruppert<sup>4</sup>, Giovanni Cinti<sup>3</sup>

<sup>1</sup>SINTEF Energy Research, Trondheim, Norway

<sup>2</sup>Institute of Combustion and Power Plant Technology (IFK), University of Stuttgart, Stuttgart, Germany

<sup>3</sup>IKN GmbH, Neustadt, Germany

<sup>4</sup>Italcementi, Bergamo, Italy

<sup>5</sup>VDZ gGmbH, Düsseldorf, Germany

This project is funded by the European Union's Horizon 2020 Framework Programme for research and innovation

# The CEMCAP project

## Objective

*The primary CEMCAP objective is to prepare the ground for large-scale implementation of CO<sub>2</sub> capture in the European cement industry*

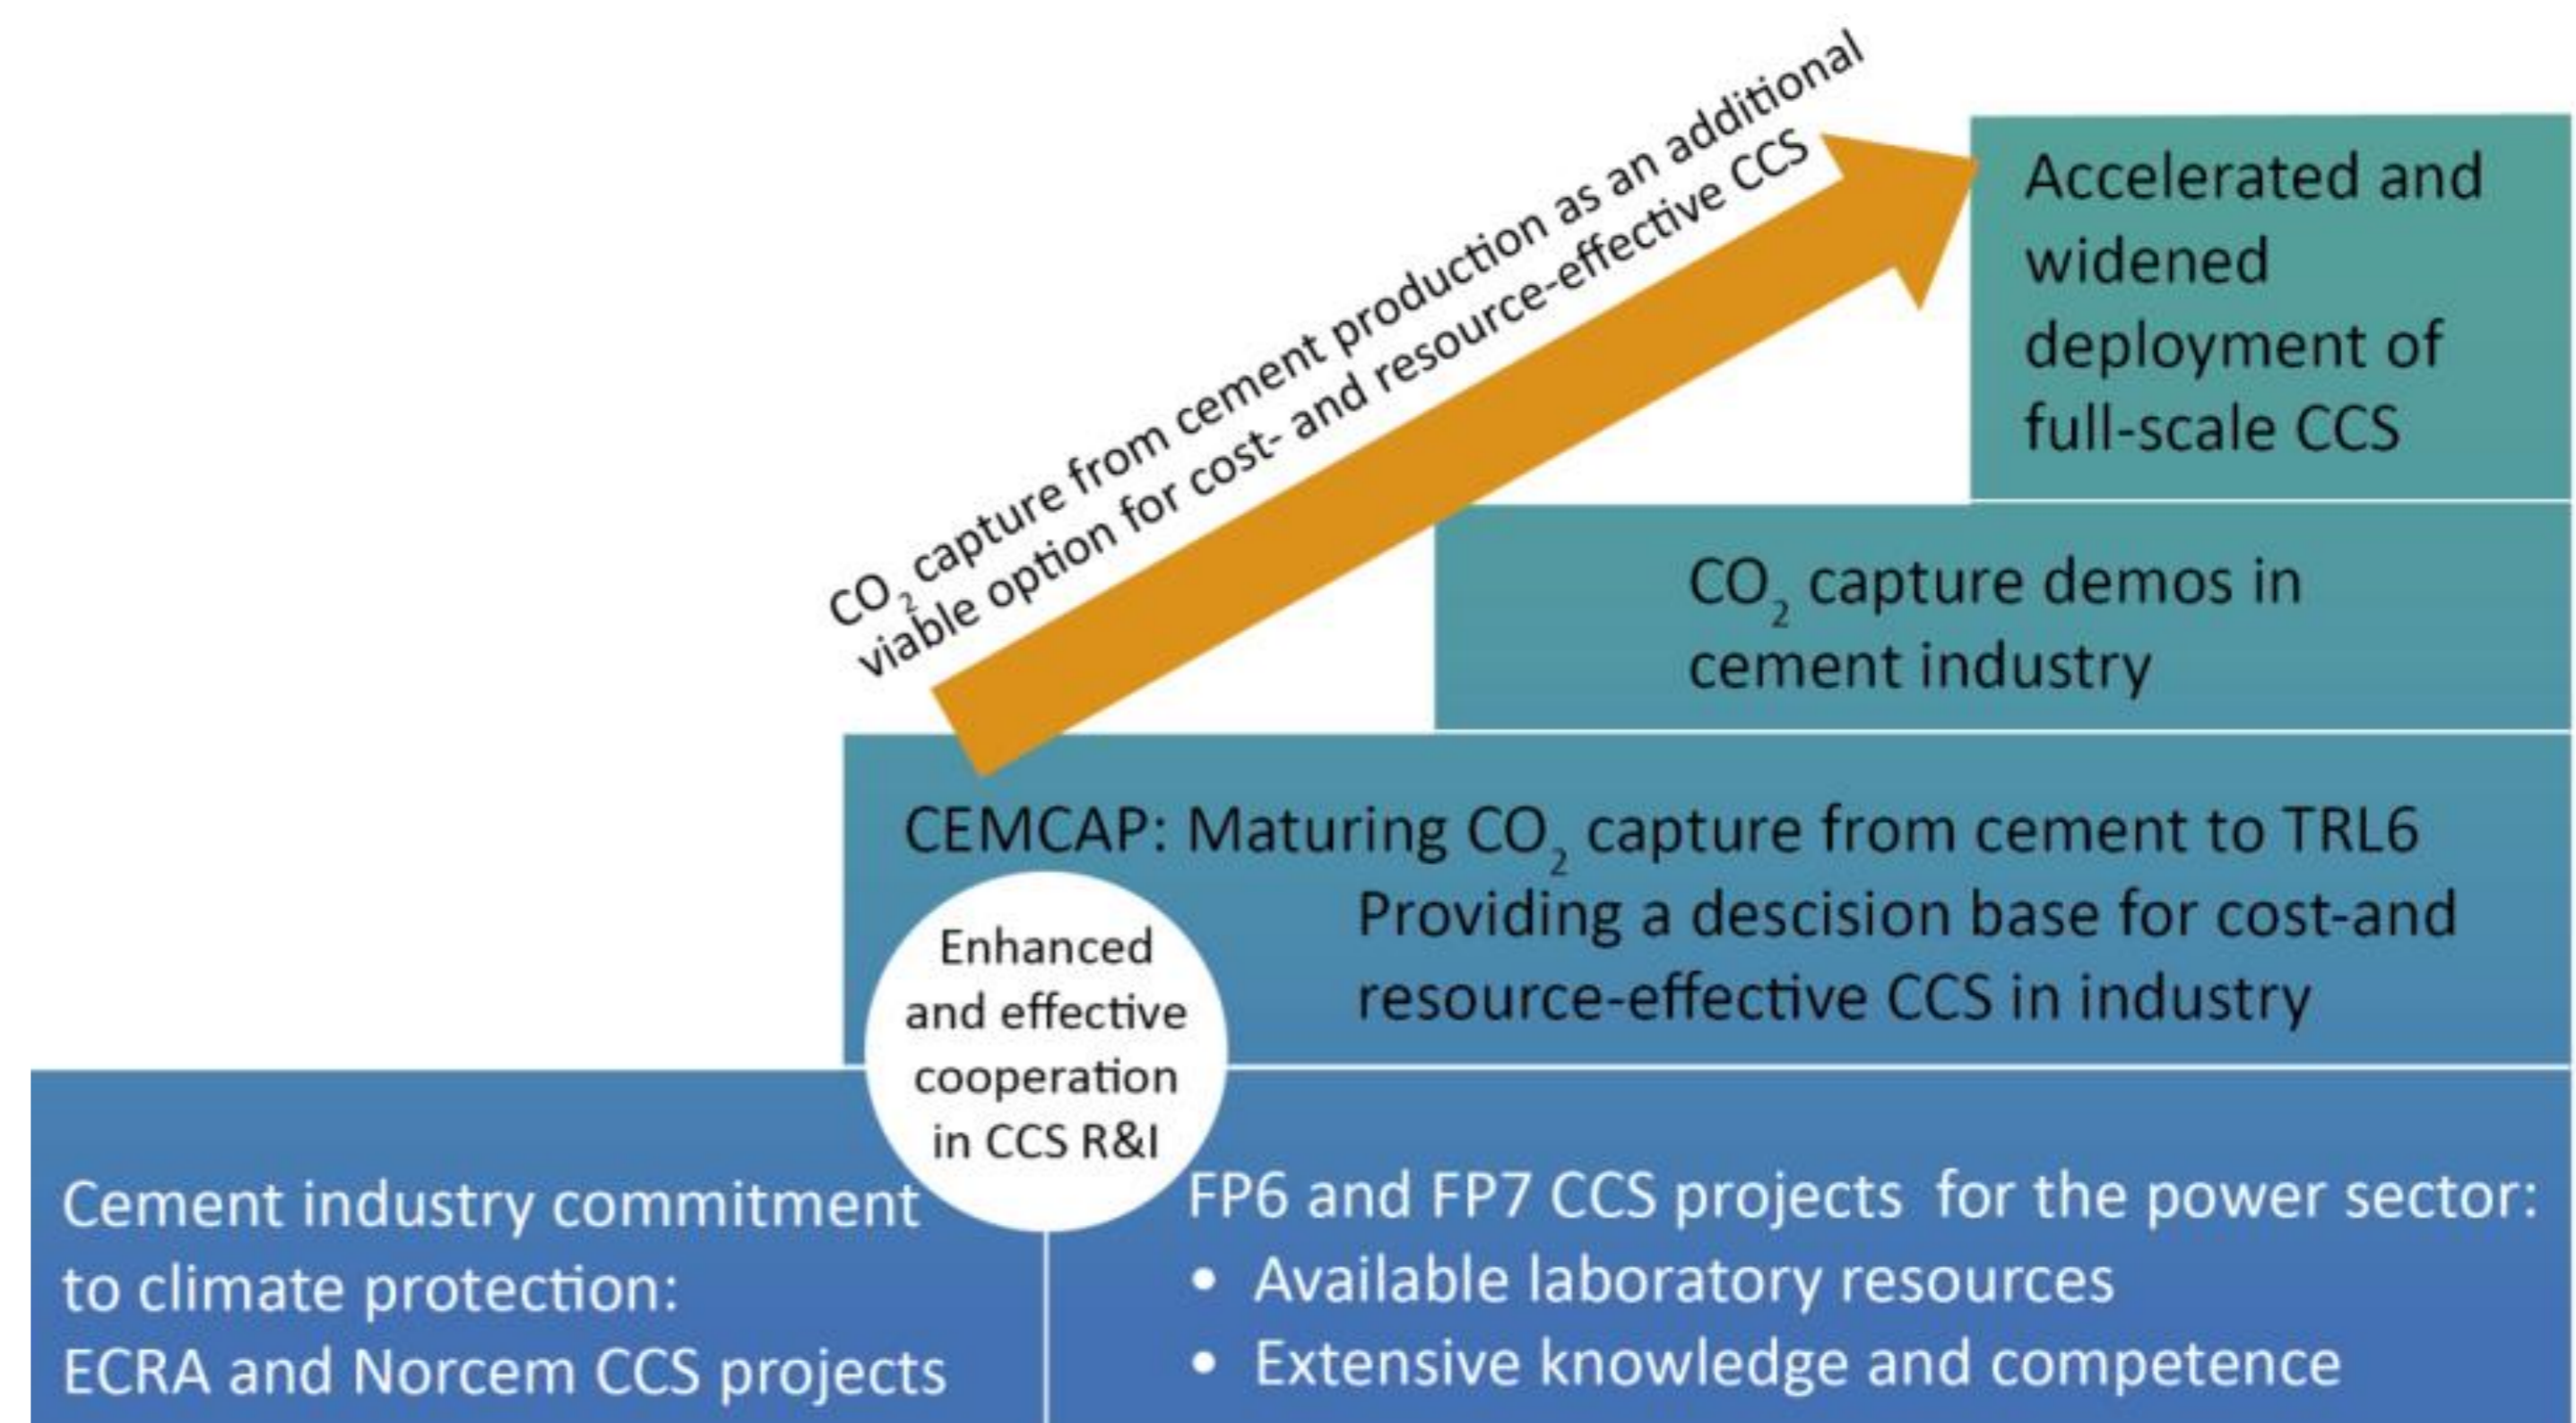

## Final project outcome in 2018

**Strategic conclusions** on how to progress CO<sub>2</sub> capture from cement plants from pilot-scale testing to demonstration.

**Recommendations** for different scenarios, i.e. different types of cement plants at different locations in Europe.

Description of **Technology gaps** to be closed, to enable CO<sub>2</sub> capture in the European cement industry.

- Using competence and knowledge from ongoing and concluded CCS projects for power industry.
- Complementing the Norcem CCS project by testing and evaluating additional post-combustion capture technologies.
- Strengthening and advancing the ECRA CCS project for through component testing for oxyfuel CO<sub>2</sub> capture.
